rug-b Ruby Rätsel

8. Mai 2014

How to immediately get a keypress event:

```
STDIN.getch
```

How to immediately get a keypress event:

```
STDIN.getch
```

What to require?

How to immediately get a keypress event:

```ruby
require 'io/console'
STDIN.getch
```

There is a special global variable in Ruby:

```
$\
```

There is a special global variable in Ruby:

```
$\
```

How is it called?

There is a special global variable in Ruby:

```
$\
```

```
$OUTPUT_RECORD_SEPARATOR
```

Its value is appended to print calls:

```
$\ = "!!!"
print "something"  # something!!!
```

Ruby has a lot of wonderful String#methods

Ruby has a lot of wonderful String#methods.

```
"rug-b"._____("-")
#=> ["rug", "-", "b"]
```

Which one are we looking for here?

Ruby has a lot of wonderful String#methods.

```ruby
"rug-b".partition("-")

#=> ["rug", "-", "b"]
```

Which one are we looking for here?

Ruby has a lot of wonderful String#methods.

Ruby has a lot of wonderful String#methods.

```ruby
"rug-b"._____(8, '-') #=> "--rugb--"
```

Which one are we looking for here?

Ruby has a lot of wonderful String#methods.

```
"rug-b".center(8, '-') #=> "--rugb--"
```

Which one are we looking for here?

Ruby 2.1 introduced new methods in core classes.

Ruby 2.1 introduced new methods in core classes.

Which instance method is new for Array?

Ruby 2.1 introduced new methods in core classes.

Which instance method is new for Array?

```ruby
[["rug", "b"]].to_h #=> {"rug" => "b"}
```
